\*\* The 99402 code is utilized for all MIHP visits occurring in the home, office or places other than the home. Home visits are reimbursed at a different rate than clinic visits. To receive appropriate reimbursement for visits, it is important that providers include the place of service when billing these codes. Reimbursement for visits will be determined by the place of service code entered on the claim. For purposes of billing, coverage is limited to a 30-minute visit.

\*\*\*For code 96154, the HCPCS definition identifies one unit as being a 15-minute session. Current policy states that each infant visit must extend at least 30 minutes in duration to be a billable service. In order to receive full reimbursement for these services, the provider should bill for two units when using this code. Medicaid will reimburse for two units or a total of 30 minutes per code. For purposes of billing, coverage is limited to a 30-minute visit. Providers must bill this code as two units to receive the total visit fee of \$81.02
